Agile/Scrum Executive Overview

4 Hours - 4 PDU's

DESCRIPTION

The Agile/Scrum Executive Overview is a 4 hour seminar introducing Agile and Scrum techniques that are increasingly being used across America and the world to advance better software development and implementation of systems. These techniques improve the quality of systems, the efficiency by which systems are developed, the frequency of delivering value to the customer and ultimately the customer's satisfaction. This seminar is a high-level overview that addresses the business value as well as the organizational adoption considerations of implementing Agile.

TOPICS YOU WILL LEARN

- What's all the Agile buzz?
- Essentials of Agile methodologies (Scrum, eXtreme Programming, etc) and Lean principles
- The Roles, Rituals and Results of Agile
- The Agile/Scrum Team
- The Agile Iterative and Incremental Delivery Framework
- Tools and practices
- Benefits of Agile
- Adoption and culture
- Risks and roadblocks
- Getting started
