

# Teaming with Agile and Scrum

➤ Fissure: n. (Geological): A breakthrough

## Teaming with Agile and Scrum

2 days - 14 PDU's

### DESCRIPTION

This course offers an alternative to the Certified ScrumMaster (CSM) training. While CSM focuses solely on the ScrumMaster Role, Teaming with Agile & Scrum focuses on the entire Team, including Project Managers, Architects, Business Analysts, Testers, Developers, and Release Managers. This team-based training will help you understand your role within the Scrum team structure and equip you through repeated practice with the knowledge, skills, and tools to successfully implement Agile/Scrum methods. After taking this highly interactive workshop, you will understand Agile and specifically Scrum concepts, why they work, and how to start using Agile/Scrum on your next project.

### TOPICS YOU WILL LEARN

- The Origins and Science behind Agile and Scrum
- The Values, Principles, Practices, of Agile
- The Scrum Team Structure, Roles, Rituals and Results
- The Elements and Flow of Scrum
- Building a Product Backlog with User Stories
- Estimation of User Stories
- Project Planning at all Levels of an Agile Project
- The Elements of the Sprint Execution
- Managing the Flow of Work using the Team Task Board
- Collaboration and Communication with Daily Scrums
- Tracking Progress with Burndown Charts
- Empirical Evidence of Progress and Feedback with Sprint Demos
- Inspect, Adapt and Improve with Retrospectives
- Dealing with the Organizational Impediments to Adoption
- Starting and Executing a Project using Scrum

### YOU WILL LEARN...

- Understand the core values, principles, and practices of Agile and Scrum
- Apply Agile/Scrum in multiple project settings and situations
- Cultivate the Agile mindset vital to effectively deliver results using the framework

### WHO SHOULD ATTEND

Project and Program Managers, Technical Leads, Testing Leads, Business Analysts, Developers and other team members who are responsible for managing or delivering solutions.

### PDU ELIGIBLE

Participants of this course are eligible to apply for 14 PDU's toward their continuing education requirements with the Project Management Institute (PMI).
